Github link: <https://github.com/Adarsh3thy/CMPE275-CloudEventCenter>

Introduction

Cloud Event Center (CEC) is an online service to organize online or in-person events. Any person or organization can post events in CEC, and those who are interested can sign up. We also provide capabilities for potential participants to ask questions prior to the events, and share moments with messages and pictures during and after the events. A reputation system will be implemented to rate participants and organizers based on the feedback for each other.

Technology Choices

1) Frontend

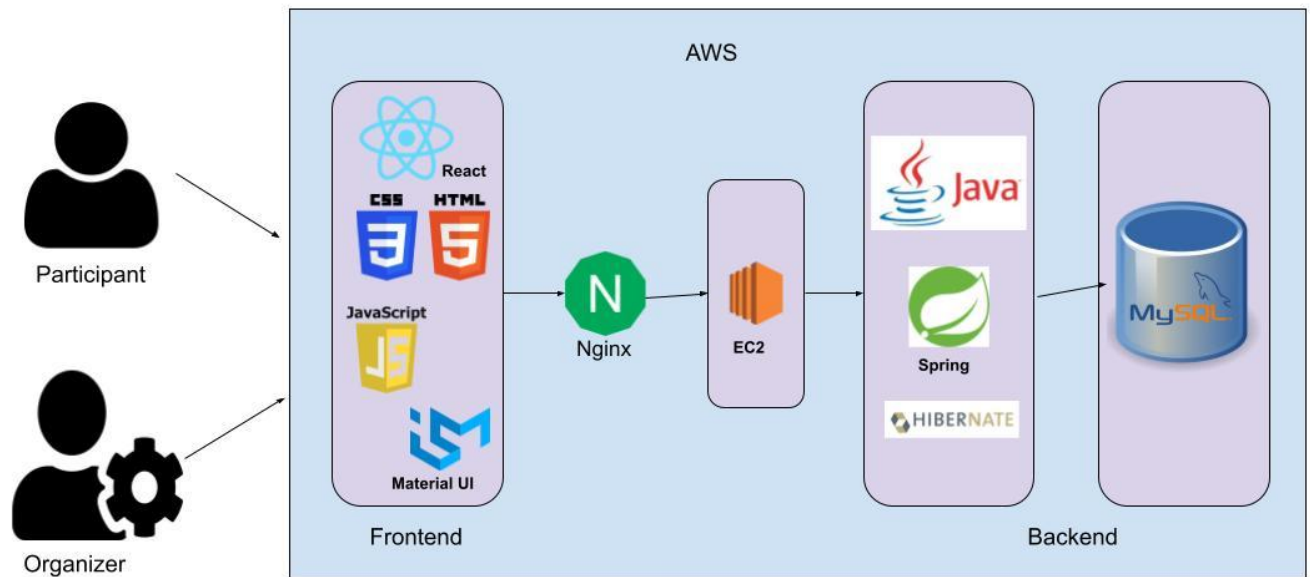

- HTML
- CSS
- Javascript
- React
- MaterialUI

2) Backend

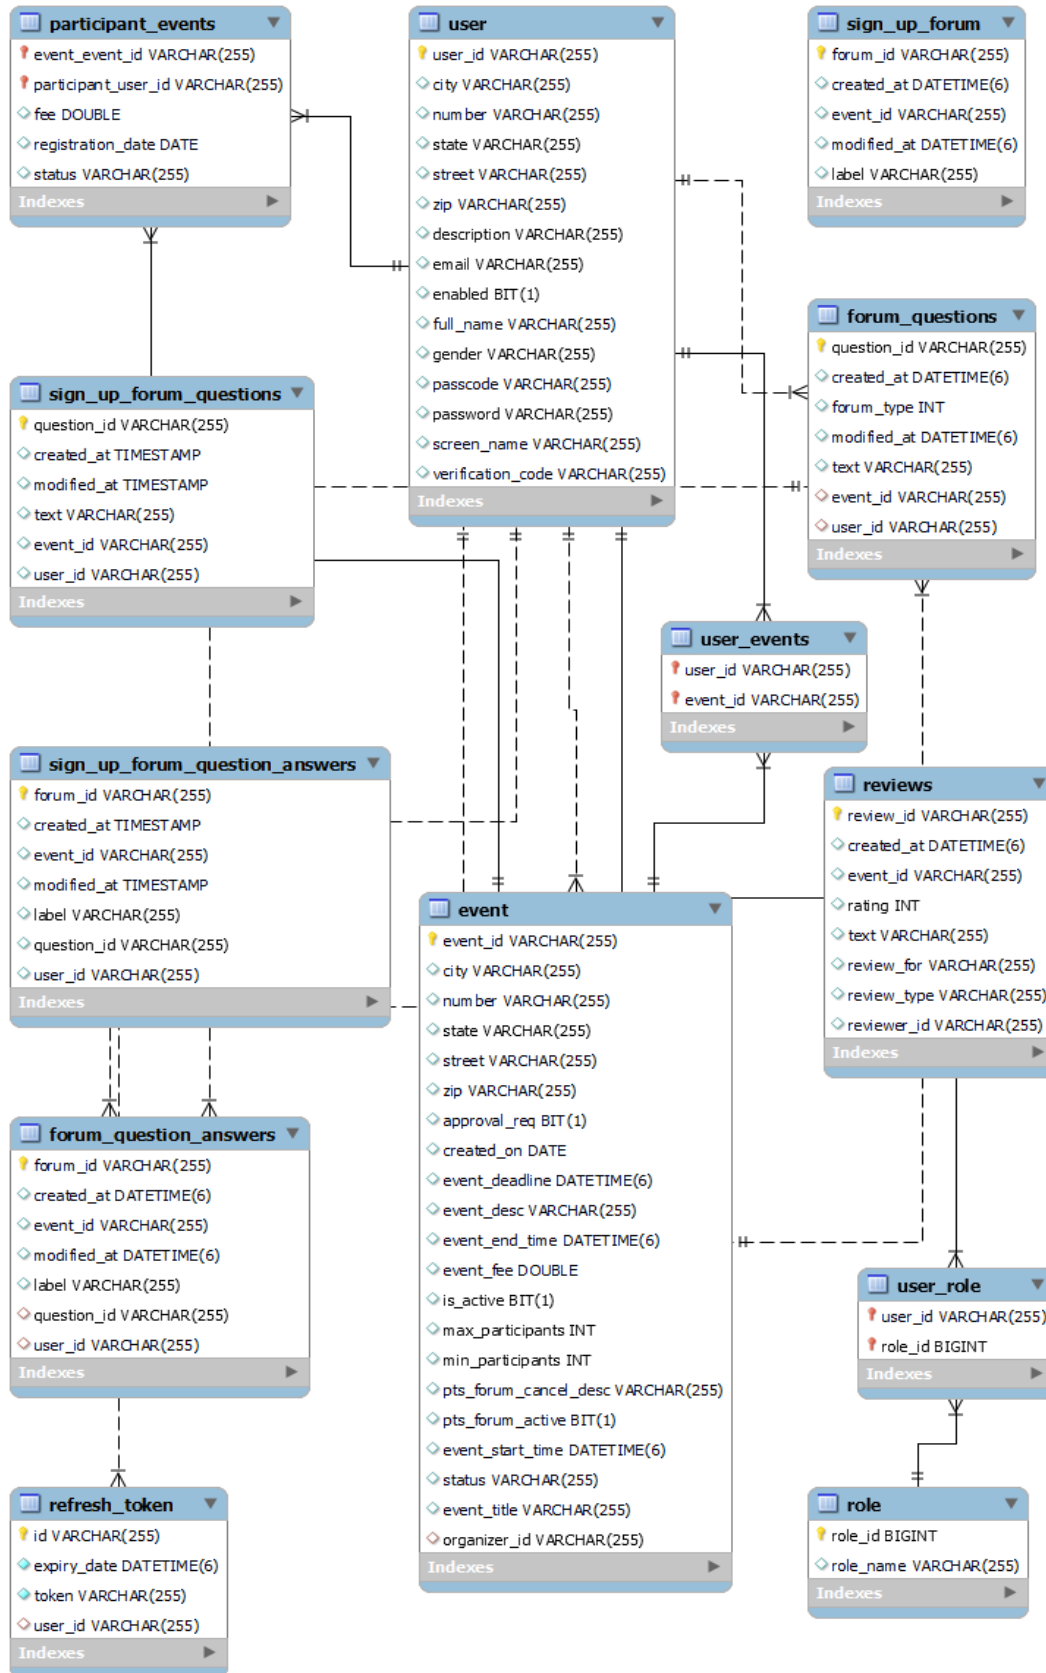

- Java - Spring
- Google OAuth

- JPA
 - Email- JMS
 - Scheduling- @Scheduler
 - Spring Security
- 3) Database
- MYSQL
- 4) Cloud Service
- Amazon Web Services (AWS)

Architecture Diagram

ER Diagram

Features and Screenshots

1) User Sign up

The user can sign up to the application in either of two ways

- a) Email
- b) Google account

In both cases, an email will be sent to the user's email address for verification. Only after the account is verified, the user will be able to sign in the application

Organizing events has never been that easy.

Get started with CEC!

to me ▾

Dear Organizer ,
Please click the link below to verify your registration:

[VERIFY](#)

Thank you,
CEC

Cloud Event Center <cmpe275zhangproject@gmail.com>

to me ▾

Dear user,

Thank you for verifying your email address.
You will be able to sign-in to our website now.

Best,
CEC

2) Login Screen

The user can login to the application in two ways, depending on the option that he chose for registration. In case of standard email/password, the credentials will be compared against the values in the database. In case of incorrect credentials, error will be thrown.

If the user chooses to sign-in through google, his oAuth token will be sent to google for validation and on success he will gain access to the application.

Organizing events has never been that easy.

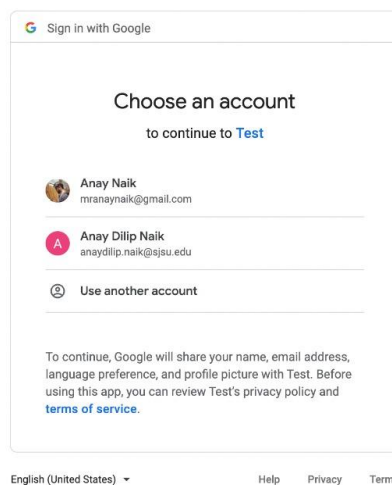

Sign In

[↑ Sign in](#)

Or

Don't have an account? [Register](#)

3) Update User Information

When the user log's in for the first time, he must provide below information:

- a) Full Name(*): full name of the user
- b) Screen Name(*): screen name that will be displayed on the profile
- c) Gender: optional, and applies to persons only.
- d) Description: optional text to describe the user.

e) Address: Street and number (optional), City, State, Zip Code.

The screenshot shows a web browser window with a URL bar displaying '3.84.6.242.3000/update-user'. The page has a sidebar on the left with a 'CEC' logo and a menu with items: Reports, Update User, Events, Registrations, and My Events. The main content area is titled 'Update your user information.' and contains a form with the following fields:

- Full Name *: organizer 2
- Email: daniilo8142@cupbest.com
- Account type: Organizer (dropdown)
- Screen Name *: organizer 2
- Gender: Male (dropdown)
- Description: SJSU student
- Street: (empty)
- Apt no: (empty)
- City: (empty)
- State: (empty)
- Zip Code: (empty)

A blue 'Save' button is located at the bottom of the form.

4) Create New Event

Any user can create an event, he must provide the below information:

- Title: brief text to name the event.
- Description: text to describe the event.
- StartTime: date and time for the event to start. Must be in the future.
- EndTime: Must be after the start time.
- Deadline: date and time that participants must sign up before. A deadline must be no later than the start time. This is also the time the sign-up forum closes for new postings and entering read-only mode.
- Address: Street and number (optional), City, State, Zip Code.
- MinParticipants: (inclusive) the minimum number of participants that must sign up before the deadline, or the event will be canceled.
- MaxParticipants: (inclusive) capacity of the event; if reached, no new sign-ups are accepted.
- Fee: amount in USD. An event can either be free or paid - only an event created by an organization can require a fee. If the fee is provided as 0, it is assumed to be free.
- Admission Policy: Either 'First come first server' in which case approval is not required by the user, or 'Approval required' when approval is required by the organizer.

The organizer will receive a notification on successful creation of the event.

Sun, May 22, 11:30 PM (3 days ago)

Dear Organizer,

The event **kite flying event** has been successfully created. Users will be able to sign up for the event now.
Best of luck with your event!

Best,
CEC

5) Events Search

The user can search for available events and sign-up for them. He has the below filters for searching:

- Location: It will be set to the user's city by default. He can provide a different value if required.
- Status: the following three statuses are allowed
 - Active: An event that has not been canceled and has not finished is considered active.
 - OpenForRegistration : events that are open for registration
 - All : all events including past and canceled events.

- c) **StartTime & EndTime:** (EndTime is optional, defaults to infinite future) Only events that occur within the given time window will be shown in the filtered results. The StartTime defaults to the current time, if not given.
- d) **Keyword:** This search needs to partially match (be a substring of) against the title and description fields. Case is ignored for matching. When not given, it is ignored, hence matches everything.
- e) **Organizer:** this is used to partially match against (be a substring of) the screen name of organizers, also in a case insensitive way. When not given, it matches every organizer.

Events

[+ NEW EVENT](#)

City	Keyword	Status All
Start time	End time	Organizer

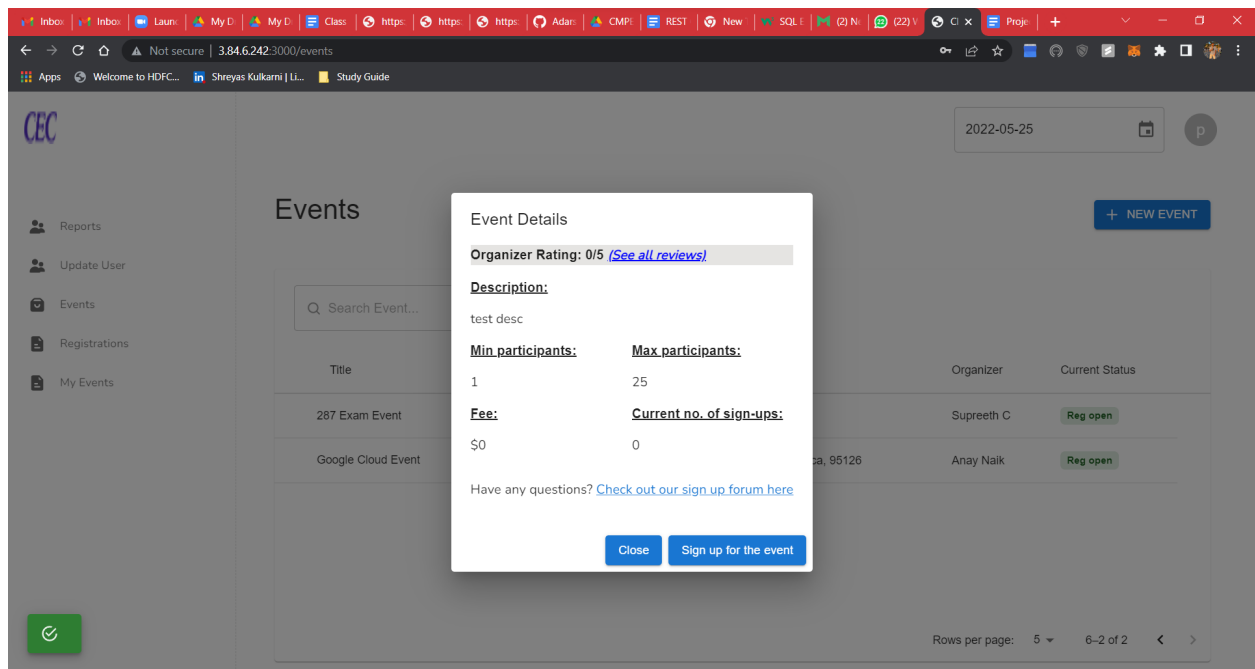

Title	Time	Location	Organizer	Current Status
287 Exam Event	2022-06-26 - 2022-06-26	899 , SJ, CA, 95126	Supreeth C	Reg open
test event	2022-05-28 - 2022-06-01	838 Cinnabar Street , San Jose, CA, 95234	organizer 2	Reg closed
Kite Flying	2022-05-28 - 2022-05-28	Branham Lane , Milpitas, CA, 56555	Vigova	Cancelled
SJSU Virtual Event	2022-05-30 - 2022-05-31	one washington square, sjsu campus, san jose, ca, 95126	Anay Naik	Reg open
Google Cloud Event	2022-05-28 - 2022-05-29	838 cinnabar, 301, san jose, ca, 95126	Anay Naik	Reg open

6) Event Details

The user can view the details of the event such as Description, Min/max participants, fee, current number of participants by clicking on the event in the event search results. The user can even access the sign-up forum from here, where he can ask questions about the event.

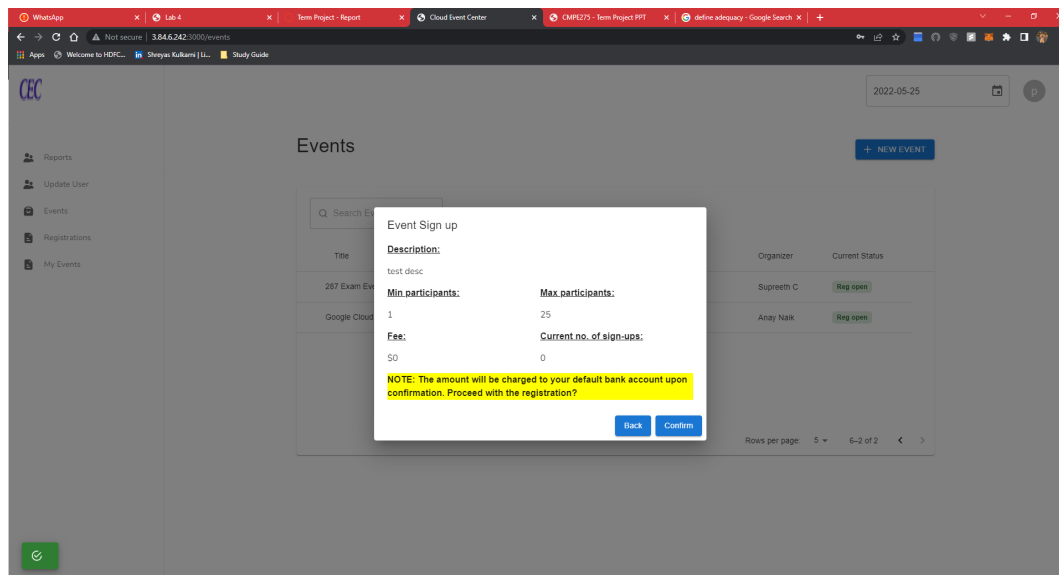

He can also view the reviews of the organizer for the event.

The user can register for the event by clicking on 'Sign up for the event'.

7) Sign-up for events

After the user clicks on 'Sign up for the event', the user will be taken to a confirmation screen. If the event involves any fee, a notification will be displayed below. Clicking on 'Confirm' registers the user to the event if the event has auto approval, else it is sent to the organizer for approval.

Notification to event organizer:

25-05-2022 2

Subject: Thank you for signing up to the event!

Dear user,

Thank you for signing up for the event, **YellowStone Trekking**. The event starts at **2022-05-28T01:16:41**, and you can access the participant forum on **2022-05-27T00:19:41**.
See you soon at the event!

Best,
CEC

8) events page

The user can access all the events that he has registered for from 'My events' page. He can even view the status of his registration from here.

The screenshot shows a web browser window with multiple tabs. The active tab is 'Cloud Event Center'. The address bar shows '38462423000/registrations'. The page has a sidebar with the CEC logo and a menu with items: Reports, Update User, Events, Registrations, and My Events. The main content area is titled 'Registrations' and contains a table with the following data:

Title	Time	Location	Current Status
Google Cloud Event	2022-05-28 - 2022-05-29	838 cinnabar, 301, san jose, ca, 95126	Reg open

At the bottom right of the table, it says 'Rows per page: 5' and '6-1 of 1'.

9) My Events

The organizer can access all the events that he has organized from My events page. He can approve/reject participants for the event from this page by clicking on any event.

My Events

Title	Time	Location	Current Status

11) Sign-up Forum

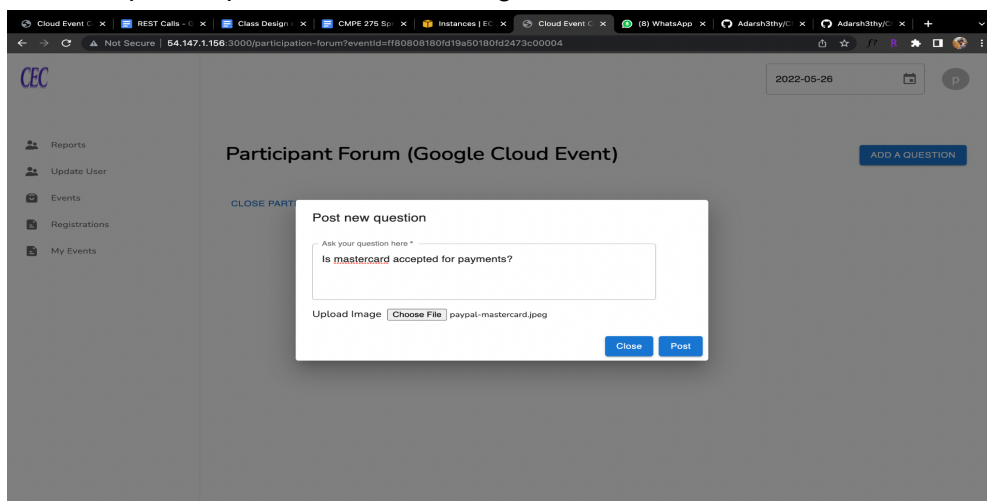

Sign-up forum is open to every user once the event has been created.

- Everyone can post questions and answer questions.
- Messages from the organizer are marked in the UI so that it is obvious that the sender is the organizer.
- Messages should allow a mix of text and pictures.
- The sign-up forum becomes closed for posting of new messages once the event registration deadline passes, or the event has been canceled.

12) Participant Forum

User can post a question and add images if he/she wants

Participant Forum (YellowStone Trekking)

14) Event in Progress

Immediately, when the event is in progress participants will receive a notification that the event has started.

Cloud Event Center
cmpe275zhangproject@gmail.com

Subject: Event start alert

Dear participant,

The event **Google Cloud Event**, that you have registered for has begun.
Hope you have a great time at the event! Share your experience at the participant forum.

Best,
CEC

15) Event Cancellation

An event will be auto canceled if it fails to have the minimum number of participants before the event deadline. Email notification will be sent to all registered users, notifying them of the cancellation.

Cloud Event Center
cmpe275zhangproject@gmail.com

Date:
25-05-2022 20:58:59

Subject: Event cancellation alert :(

Dear participant,

We are sorry to inform you that the event **Kite Flying** has been cancelled. Any fee paid for the event will be refunded in 7 business days.

Best,
CEC

16) Reports

i) System Report

System event report: available to every user. This report shows the following numbers of from the last 90 days (based on the current virtual time):

- a) Number of created events (based on creation time) and the percentage of paid events.
- b) Number of canceled events (based on registration deadline) and total number of participation requests (regardless of approval or not) divided by the total number of minimum participants for such events.
- c) Number of finished events (based on finishing time), and the average number of participants of these events.

System Report

Created Events	5
Paid Events (%)	0
Cancelled Events	2
Participant Event Cancel Requests	0.3333333333333333
Finished Events	0
Finished Events Average Participants	0

ii) Participation report.

- Number of signed-up events (based on signing-up time).
- Number of rejects and approvals (based respective action time).
- Number of finished events (based on finishing time).

Participant Report

Signed Up Events	1
Rejects	0
Approvals	1
Finished Events	0

iii) Organizer Report

- Number of created events (based on creation time) and the percentage of paid events.
- Number of canceled events (based on registration deadline) and total number of participation requests (regardless of approval or not) divided by the total number of minimum participants for such events.
- Number of finished events (based on finishing time), and the average number of participants of these events.
- Number of paid events finished (based on finishing time) and total revenue from these events.

Organizer Report

Created Events	1
Paid Events	2
Paid Events (%)	100
Cancelled Events	1
Participation Requests by Minimum	0.5
Finished Events	0
Finished Events Average Participants	0
Finished Paid Events	0
Finished Paid Events Revenue	0

Testing Plan and Execution Results

Test Case	Status
Register to the application using email	Pass
User registered via email must receive an email for successful registration	Pass
User registered via email must receive an email for email verification	Pass
The verification email must contain a link to verify and show success message on clicking the link	Pass
After email verification, the user must be able to sign in by giving his credentials	Pass
On login, user must be directed to update his details and must be able to save it successfully	Pass
Event search must display all available events and user must be able to filter it based on city, status, keywords	Pass
Any user must be able to create event by clicking on the create event button	Pass
User must be able to view the events that he has registered for in 'My events' tab	Pass
User must be able to reset the data by clicking on date at top right corner	Pass
User must be able to view the current virtual time at top right corner	Pass
If an event requires approval, the event must be sent to approver for approval	Pass

The organizer must be able to approve/reject events that require approval	Pass
The organizer must be able to access all events that he is organizing	Pass
The user must be able to access sign up forum from the event	Pass
The user must be able to post questions/answers in sign up forum	Pass
The user must be able to post images in sign-up/participant forum	Pass
The participant forum must be accessible after event deadline	Pass
The organizer must be able to close participant forum after event closure	Pass
The participant forum must get autoclosed if organizer does not close it 72 hours after event closure	Pass
If the event does not have minimum participants before event deadline, it must be auto canceled	Pass
On event cancellation, all registered users must receive email notification	Pass
All registered users must receive email notification on start of event	Pass
Registered user must receive email notification on approval/rejection by organizer	Pass
Organizer must receive email notification on event creation	Pass
Organizer and participant must receive email notification on event sign up	Pass
Organizer must be able to post review and rating for participants	Pass
Participant must be able to post review for the organizer	Pass
Check system reports	Pass
Check organizer report	Pass
Check participant report	Pass

Lessons Learned

- We learned the adequacy of Spring and the necessity for dependency injection while developing enterprise applications.
- We learned how to work in a team to push modularized code.
- We learned how to implement OAuth, Notifications, Abstract time and data modeling.
- We learnt how to send emails using Java Mime messages integrated with Google mail server.
- We learned that applications need to be tested end-to-end, both frontend and backend together.
- We learned to plan for unexpected events and breakages.

Future Work

- Improve frontend design.
- Refactor code.
- Add desktop notifications and mobile notifications.
- Implement payment gateways like paypal.
- Implement Oauth for Facebook
- Provide limited timed discounts
- Allow an user to choose a profile picture
- Provide the user to examine the organizer's or other user's profile
